Brand guidelines

v2.3 | 26/10/2026

AhaSlides

Aha!
Our brand guidelines

This document has one job.

To be the single source of truth for our brand.

Use it to ensure clarity, consistency and impact when applying the AhaSlides brand.

Refer to it when communicating as AhaSlides — both internally among colleagues and to our favourite people: the world’s presenters.

Read on to learn what we believe, the monster we slay, who we serve, what we say and how we write, how we behave as a brand, and our visual identity.

Visual and verbal rules are kept up to date at design.ahaslides.io. Where this document and the site differ, the site is right. On wording, the brand voice rules page is right: design.ahaslides.io/foundations/brand-voice-rules.html.

Our why, how and what

Our why

We believe humans achieve much more when they genuinely engage with each other. That's the power of engagement. But getting people involved can be hard work. And we don't think it should be.

Our how

We combine playful thinking, scientific curiosity and a genuine care for people to make engagement easier. We use technology, including AI, to take on more of the work, so humans can focus on what matters: connecting, learning and achieving more together.

Our what

We're building an all-in-one engagement platform that makes it easier for teams and classrooms to get people participating, learning and sharing what they really think.

AhaSlides

What we believe

We believe in Aha moments

You know the ones.

When everyone is tuned in. Questions are flying, ideas are bouncing around, people are laughing, learning and sharing what they really think.

There's a buzz you can feel. A sense that something good is happening between people.

These are the moments that stick. When something finally clicks. When someone finds their voice.

When a team comes together. When people leave knowing, feeling or understanding something they didn't before.

That's the power of engagement.

We also believe humans achieve more when they genuinely engage with each other.

And we believe creating those moments should be easier.

Less time preparing, organising, chasing responses and figuring out what it all means. More time connecting, listening, learning and making things happen together.

That's why we're building AhaSlides: technology that takes on more of the work around engagement, so people can focus on the moments that matter.

More participation. Better feedback. Less work.

Our monster

Our monster is the unnecessary work it takes to get people engaged.

The endless preparation, juggling of tools, chasing of responses and making sense of results that turn getting people involved into another job.

We believe technology should take care of more of that work, so humans can spend less time managing engagement and more time actually engaging.

Positioning statement

The easiest way to get people involved, gather feedback and make learning stick. All with less work.

Who we serve

Educators and trainers

They want

Learners actively participating and showing what they understand, without creating more work for themselves.

Lead with

Less work and more participation.

Example

Get more people involved without adding more workload.

Leaders and culture builders

They want

People contributing, sharing what they really think and feeling involved, with a clearer picture of what's happening across the team.

Lead with

Meaningful feedback and more participation.

Example

Give everyone a way to contribute and get a clearer picture of what your team really thinks.

Event organisers

They want

An energetic, participatory experience that people remember, without complicated tech getting in the way.

Lead with

Participation and live experiences.

Example

Get the whole room involved, without adding more work behind the scenes.

An important note...

Our positioning stays the same (the easiest way to take the work out of engagement). What we lead with changes according to what matters most to the audience.

For an educator and trainer, less workload and more student participation are equal reasons for them to care.

For leaders and culture builders, “save 20 minutes creating a poll” may be much less exciting than hearing from employees who don’t normally speak up.

For an event organiser, it’s probably all about the buzz of a live experience.

AhaSlides

Messaging

We help teams and classrooms engage more while working less.

By using AhaSlides, our users...

- Spend less time, admin and effort managing engagement
- Get more people participating
- Get more meaningful feedback

If your message communicates at least one of these ideas, you're heading in the right direction.

Let’s be clear...

Take the work out of engagement = what AhaSlides does
Spend less time managing it = immediate benefit

Get more participation = engagement outcome
Get more meaningful feedback = engagement outcome

More time actually engaging = human payoff

For those at the back...

“AhaSlides takes the work out of engagement”

(More participation. Better feedback. Less work!)

Not just: our software is easy to use.
Rather: we reduce the work you have to do.

How we describe AhaSlides

Primary description:

AhaSlides is an all-in-one engagement platform for teams and classrooms

Use this when you need to clearly describe our category or what AhaSlides is.

Customer-focused description:

AhaSlides takes the heavy lifting out of engagement, making it easier to get people participating and understand what they really think.

Use this when explaining why AhaSlides matters.

Short description

AhaSlides takes the work out of engagement.

Use this when the context already makes it clear what AhaSlides is.

Our three messaging pillars

Core message #1

Spend less time managing the admin of engagement

Engagement shouldn’t create a pile of extra work. So AhaSlides takes the misery out of creating, running and following up on engaging experiences. Our users have more time for the people part.

Useful language:

Take the admin out of engagement.

Spend less time managing engagement.

Get hours back, not more work.

Less time preparing. More time with people.

Let technology handle the heavy lifting around engagement.

Talk about:

time saved
less admin
easier preparation
AI assistance
simplicity
automation
reporting
follow-up
reliability

Core message #2

Get people participating more often and wherever they work.

People get more from an experience when they actively take part. AhaSlides gives everyone a way to get involved, not just the loudest or most confident voices in the room.

Useful language:

Get everyone involved.

Turn passive audiences into active participants.

Give everyone a way to contribute.

Create shared moments people want to be part of.

Talk about:

attention
participation
interaction
involvement
inclusive
contribution
live energy
fun
bringing people together

Core message #3

Get feedback you can actually do something with.

Engagement isn’t only about getting people to respond. What comes back should help you understand them. AhaSlides helps you discover what people think, know and need.

Useful language:

Find out what people really think.

Understand what your audience knows and needs.

Get something meaningful back from every session.

Turn participation into useful feedback.

Talk about:

audience
understanding
feedback
responses
knowledge
opinions
insights
results
reporting

Our opinions

Use these opinions to take a side, make a stand and give people a reason to come with us.

These three core opinions are the foundation for what we have to say. They give us a springboard for many more points of view, content ideas and hooks.

Instead of simply telling people what AhaSlides does, they help us say something about the way people work, learn and engage — signalling what we believe and giving people the chance to agree, disagree or side with us.

You can’t replace the buzz you feel from a room of fully tuned in people.

When people are genuinely involved, the room takes on a life of its own. Questions change the conversation. Unexpected things happen. People create something together that couldn’t have happened without them. You can replay what happened but you can’t replay what it felt like.

Getting people involved doesn’t have to suck (your time, your energy or your will to carry on).

Hours of prep. More admin. Chasing people for responses. No thank you. Technology should take more of that work off your plate, so you can spend less time making engagement happen and more time actually engaging.

The more AI can do, the more human we need to be.

AI should give us more bandwidth for people, not more ways to avoid them. Sure, it can help us do the work, but we still own the outcome. Care, connection and the conversations that really matter shouldn’t be optimised or handed off to robots.

How we behave

Our brand spices make us different

They are strains of DNA.

They can be found in everything we do.

They make us unique and memorable in a busy category.

Our three brand spices are:

Playful
Scientific
Above and beyond

What our spices mean

Playful

We're playful people with a playful product. Whether we're designing slides, writing copy, running meetings or launching features, we believe work should spark joy—not just check boxes.

Being playful means using humour and creativity to break monotony, lift energy, and bring people together. Because even the most serious professionals are human—and we all engage better when there's a splash of fun.

Scientific

We back everything up with data, insight, and research. Whether we're designing a feature, writing a message, presenting an idea, or supporting a user, we always aim to understand the "why" behind human attention and engagement.

Being scientific means grounding our work in evidence, learning from real behaviour, and staying curious about how people think, feel, and connect. It's how we stay credible, useful, and trusted—from the smallest classroom to the largest meeting room.

Above and beyond

We're all about creating "aha moments" for our users and colleagues. Whether it's in our product experience, pricing, communication, customer service, or the way we support each other at work, we aim to work hard to go above the status quo and beyond expectations.

Being above means doing better than what's currently out there. And going beyond means doing it with empathy, pride, and real human care. It's about solving problems curiously and delivering more than people hoped for.

Playful

How it sounds:
Energetic, witty, and conversational.

How we apply it:
Use fun analogies, light humour, and an informal but professional tone. Speak like a friendly expert, not a boring professor.

We keep things fun, but never silly.

What we'll do

- Use bright, bold and unexpected colours
- Dynamic motion in our animations
- Fun illustrations
- Communicate like a consumer brand
- Have a light and fun tone
- Use playful analogies and metaphors
- Use MEMEs in our marketing
- Lean into pop culture and trends
- Tap into irrational and emotional benefits
- Create fun tools
- Encourage experimentation
- Break conventions in UI / UX
- Use gamification
- Champion playfulness in the workplace
- Create fun experiences at exhibitions

What we won't do

- Be too B2B or overly corporate
- Simply follow how others do things
- Be predictably SaaS
- Discourage experimentation
- Use uninspiring stock imagery
- Focus solely on rational benefits
- Use playfulness at the expense of clarity

Scientific

How it sounds:
Clear, insightful, and backed by research.

How we apply it:
Use research and data to reinforce engagement strategies. Avoid vague claims—everything is grounded in evidence.

We educate but never lecture.

What we'll do

- Always use data and insights
- Visualise statistics and champion reporting
- Leverage research, case studies and peer reviews
- Reference psychology and cognitive science
- Feature expert voices and debunk myths
- Own the “science of distraction” conversation
- Use data-driven storytelling and precise reporting
- A/B test, experiment and drive continuous improvement
- Make evidence-based decisions only
- Ask users for opinions and feedback

What we won't do

- Avoid vague claims
- Make assumptions
- Appear elementary
- Be childish
- Follow trends blindly
- Use clickbait or sensationalism
- Make decisions on gut feelings
- Ignore analytics
- Be cluttered or overwhelming
- Make misleading promises

Above and beyond

How it sounds:
Confident but humble, thoughtful but not flashy

How we apply it
Add that extra touch—whether in copy, product interactions, or customer experiences. Make people feel seen, valued, and supported.

We deliver aha moments that feel personal and meaningful

What we'll do

- Pay attention to the small details
- Regularly ask “How can we make this experience even better?”
- Be inquisitive—start with why to ensure everything we build has real impact
- Go the extra mile to exceed expectations, not just meet them
- Raise the bar—whatever our competitors offer, we aim to offer more, for less
- Always be there—present, welcoming, asking open-ended questions
- Show empathy and support to both users and teammates
- Follow up with users to make sure problems are truly resolved
- Reward our most engaged users in meaningful ways
- Do the invisible work that leads to unexpectedly great outcomes

What we won't do

- Be lazy or settle for “good enough” when we know it could be great
- Rely on generic, closed off or robotic replies, especially in support or comms
- Be unavailable or make people chase us for answers or updates
- Treat users like ticket numbers or just another email
- Deliver features without real user value or purpose
- Forget to follow through or close the loop with users
- Wait to be asked when we can anticipate needs first
- Assume what worked before is still the best way; we stay curious and open to better

AhaSlides

Our tone and voice

The AhaSlides tone and voice

Keep it playful and energetic, but not childish.

Use humour but never at the expense of clarity, or in ways that feels risky.

Avoid generic corporate jargon—speak like a human, not a machine (and not AI!)

Infuse copy with energy, taking note of pace and rhythm.

Speak with authority, but keep it approachable.

We are experts in engagement, and we use research to back up what we say say.

We don’t talk myths or rumours. And we don’t fear monger.

We are never overly academic or robotic.

Our knowledge should be grounded in facts, accessible and exciting.

Go above and beyond but not in a performative way

Strike a tone that’s warm, respectful, and intentional.

Use language that shows we care about the people behind the screen.

Speak with curiosity about what truly connects audiences and empowers presenters.

Raise the bar with thoughtful words—not loud ones.

When in doubt, avoid these things

Overly dry or serious

We're scientific, but not boring with it. If we're bored of our content, our audience probably is too.

Too corporate or B2B

No lifeless, jargon-heavy sentences or turns of phrases you've seen used by other software companies.

Overly complex

We're not trying to use big words to sound clever. We simplify, not overcomplicate.

Over the top

Effort should feel thoughtful and intentional —not over the top or unnecessary.

Writing rules

Use simple English

Prefer: Get more people involved.

Not: Facilitate increased levels of participant engagement.

Write like a human

Prefer: Nobody wants another meeting where three people do all the talking.

Not: Modern organisations face significant challenges around employee engagement.

Lead with what matters to them

Prefer: Find out what your team really thinks.

Not: AhaSlides provides advanced polling functionality.

Show what work we take away

Prefer: Turn your existing presentation into an interactive session without starting again.

Not: Make engagement effortless with AhaSlides.

One message at a time

Don’t try to communicate participation, feedback, AI, integrations, analytics, affordability and every product feature in the same headline.

Words to be careful with

“All-in-one”

Use when describing our platform ambition or breadth. Do not use it as a substitute for explaining the customer benefit.

“Engagement”

Never assume the word explains itself. Wherever possible, show what engagement means: people participating, contributing, responding and sharing what they think.

“Aha moments”

This is valuable brand language. Don’t overuse it. Save it for moments of human connection, discovery, shared energy or the deeper purpose of AhaSlides.

“AI”

AI is an enabler, not the hero. The story is not: Look what our AI can do. The story is: AI does more of the work around engagement, so people have more time for the human part.

AhaSlides

Quick checklist

Quick writing check

Before publishing, ask...

- [ ] Is it clear who this message is for?
- [ ] Am I leading with what matters to them, not what AhaSlides does?
- [ ] Does it show how we reduce work, increase participation or create meaningful feedback?
- [ ] Is the language simple, clear and human?
- [ ] Am I making a specific point, rather than a vague claim?
- [ ] Could a competitor say exactly the same thing?
- [ ] Have I added unnecessary corporate or AI language?
- [ ] Does it still feel human and AhaSlides?
- [ ] If I mention AI, is human engagement still the goal?

If you’re unsure, make it simpler, more specific and more human.

Visual identity

How we look

AhaSlides' visual identity balances playfulness with professionalism.

It captures the energy our existing customers love while ensuring credibility among those who need convincing.

We strive to be a dynamic and trusted brand that can hold our own in both educational and corporate contexts.

The logo

Our logo is two elements: the Splash and the AhaSlides wordmark.

Show it the same way at every brand touchpoint.

The Splash

The wordmark

Colour, on white

White, on Vivid Pink

Black, one-colour print only

Smallest size

154 × 35 px on screen; 175 × 40 mm (40 mm high) in print.

Clearspace

To keep it readable, always leave a minimum amount of space around the AhaSlides logo. This space separates the mark from anything that competes with it, such as other logos, headlines or body copy.

Step 1
Pick the letter A.

Step 2
The height of the A = X. Keep X clear on every side.

Logo on a ground

Colour logo on white.
White logo on Vivid Pink.

Black logo and **black Splash**: only where one colour is all that can be printed, such as one-colour print or engraving, and only on white.

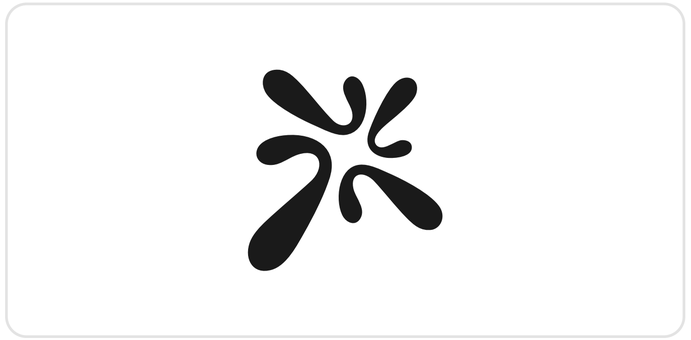

Colour logo on white

White logo on Vivid Pink

Black logo: one colour only

Black Splash: one colour only

The Splash

We use The Splash as a stand-alone brand element, as well as part of the logo. By doing so, it creates a strong and distinctive brand symbol.

It follows the logo's rules: colour on white, white on Vivid Pink.

To use The Splash as a background pattern, see Splash backgrounds on page 61.

Colour Splash on white

White Splash on Vivid Pink

Isotype

The isotype is The Splash on its own. Use it as the browser favicon, as a social media avatar or as a secondary graphic element.

Our logos are made for the web and have a responsive version: in small spaces the isotype takes over from the full logo.

256 x 256

180 x 180

152 x 152

60 x 60

16 x 16

Transparent, or in a Vivid Pink circle or square. On Vivid Pink The Splash is always white.

Incorrect usage

These examples show the most common mistakes with the AhaSlides logo.

Use the logo files from the design system as they are.

- Don’t change the colours

- Don’t rotate or tilt the logo

- Don’t put it on a ground it was not made for

- Don’t separate or move the elements

- Don’t stretch the logo

- Don’t apply gradients to The Splash

- Don’t apply gradients to the wordmark

Colours

Our palette is deliberately small. Vivid Pink, white and black do almost all of the work.

The design system is the source of truth for colour: design.ahaslides.io.

Vivid Pink #E70E68

The one primary colour. Primary buttons, link hover, the key series in a chart.

White #FFFFFF

The page.

Black #1A1A1A

Text, borders, shadows, dividers, app surfaces.

Darker Pink #DB005B

Button hover. Splash backgrounds on Vivid Pink.

Supporting colours

Each supporting colour has one job. Use it only for the job listed under it.

Illustrations may also use tints of Vivid Pink, inside the illustration only.

Vivid Pink 5%
#FEF3F7
Light grounds and sections, hover and selected states

Vivid Pink 30%
#F8B7D2
Charts only

Chart greys
Dark grey #303030
Light grey #A8A8A8
Charts only

Purple
#6A1EBB
Logo and one small accent, never text

Answer colours
#008A05 · #C7401E
A correct or wrong answer only

Black and greys
Black at any opacity, app grey #F7F7F7
Text, borders, app surfaces

Digital and print specs

Digital

Use HEX and RGB on every screen.

Print

The design system does not define CMYK or Pantone values for these colours yet. Until it does, print from the RGB values, ask for a colour-managed proof and have the design team approve it.

Do not reuse the CMYK and Pantone values from v1.0: they belong to retired colours.

Colour	HEX	RGB	CMYK	Pantone
Vivid Pink	#E70E68	231, 14, 104	n/a	n/a
Darker Pink	#DB005B	219, 0, 91	n/a	n/a
White	#FFFFFF	255, 255, 255	n/a	n/a
Black ink	#1A1A1A	26, 26, 26	n/a	n/a
Vivid Pink 5%	#FEF3F7	254, 243, 247	n/a	n/a
Vivid Pink 30%	#F8B7D2	248, 183, 210	n/a	n/a
Dark grey	#303030	48, 48, 48	n/a	n/a
Light grey	#A8A8A8	168, 168, 168	n/a	n/a
App grey	#F7F7F7	247, 247, 247	n/a	n/a
Answer, correct	#008A05	0, 138, 5	n/a	n/a
Answer, wrong	#C7401E	199, 64, 30	n/a	n/a
Purple (logo, accent)	#6A1EBB	106, 30, 187	n/a	n/a

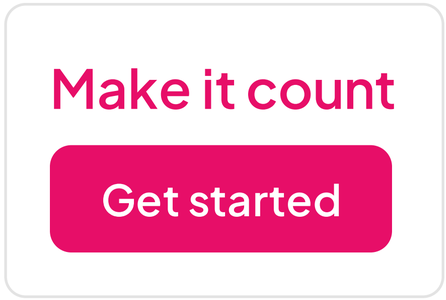

Backgrounds

Marketing

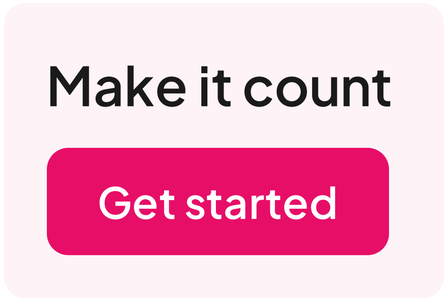

Social, ads, slides, print and video use white or Vivid Pink. Nothing else.

Web pages are white, and so is the first screen. Full-width sections may be Vivid Pink or Vivid Pink at 5%, and such a page may open with a Vivid Pink hero.

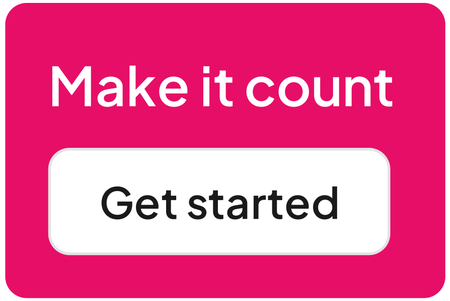

Two coloured sections never sit next to each other: a full white section goes between them. A page has at most two Vivid Pink sections. There is no dark mode.

White
Primary button

Vivid Pink 5%
Primary button

Vivid Pink
Secondary button

In the product

- App grey #F7F7F7 for cards, sidebars, inputs and the editor workspace; never a whole page.
- Vivid Pink 5% only for hover and selected states, plus at most one highlighted panel per screen.
- Black only for full-screen presenting and video or image viewers.
- A gradient only on the border of an AI feature.

Splash backgrounds

On white, the hooks are Vivid Pink 5%. On Vivid Pink, they are Darker Pink.

Use **right** when the content sits on the left, **centre** when it is central and **minimal** when the middle must stay clear.

Use the design-system files as they are: never redraw, stretch or re-crop The Splash.

Centre, on Vivid Pink

Right, on Vivid Pink

Minimal, on Vivid Pink

Centre, on white

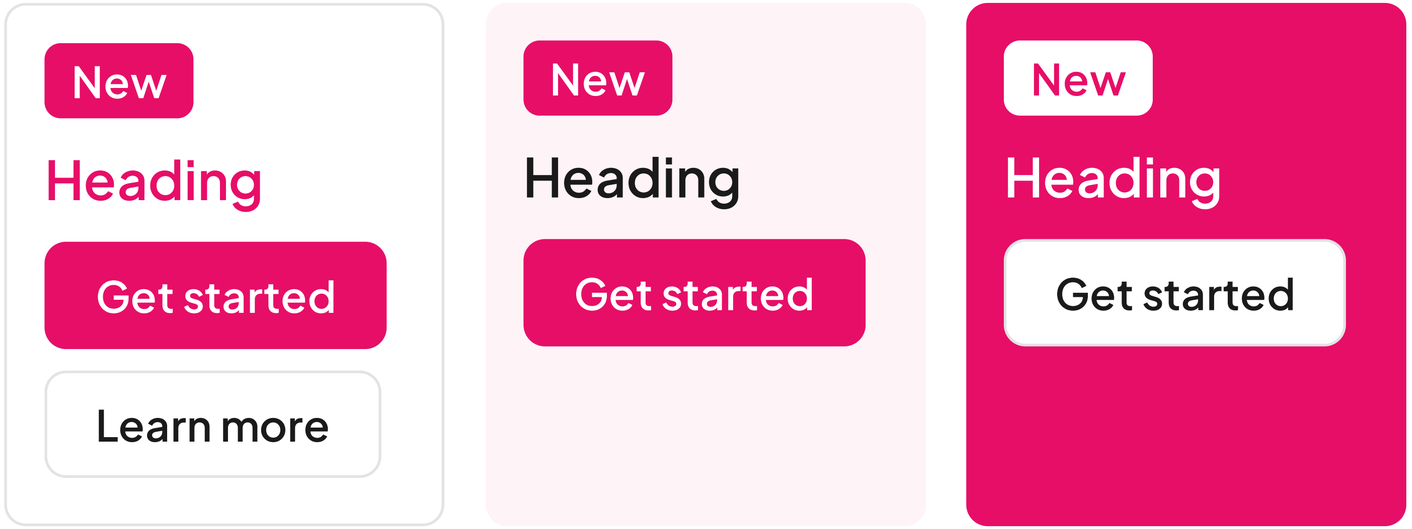

Right, on white

Minimal, on white

Text, buttons and tags

Text is solid: black or Vivid Pink on white, white on Vivid Pink. On Vivid Pink 5% or grey, text is black.

Buttons: the primary Button on white and on Vivid Pink 5%; the standard secondary Button on Vivid Pink. On white, the secondary Button is white with a grey border and a black label.

Tags and badges

Use the design system's Tag and Badge. A tag is Vivid Pink with white text on white and on 5%, and white with Vivid Pink text on Vivid Pink.

Never Vivid Pink text on Vivid Pink 5%: at 4.16:1 it fails the contrast rule.

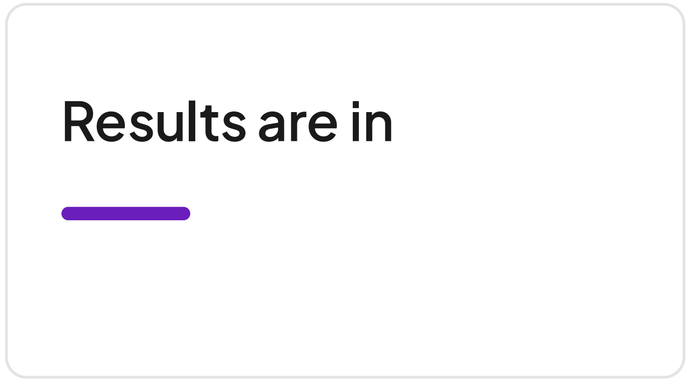

Purple and partner logos

Purple is in the logo. Outside it, at most one small decorative element per page, on white. Never text, buttons, charts or backgrounds.

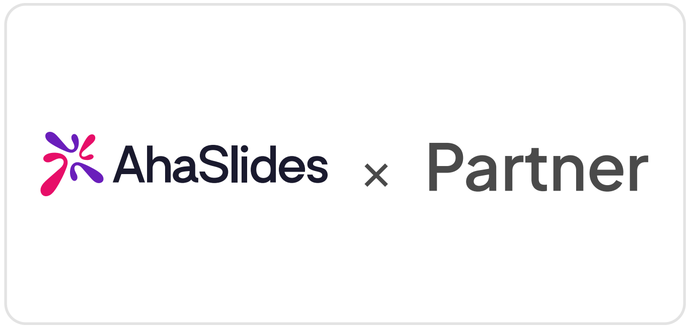

Partner logos are greyscale at rest and show their brand colours on hover and focus. Listing pages, such as the Marketplace, keep original colours.

Purple, inside the logo

One small accent, on white

Partner in greyscale, at rest

Partner in white, on Vivid Pink

Accessible pairings

Contrast is a ratio (WCAG 2.1). Text needs at least **4.5:1**; large text at least **3:1**.

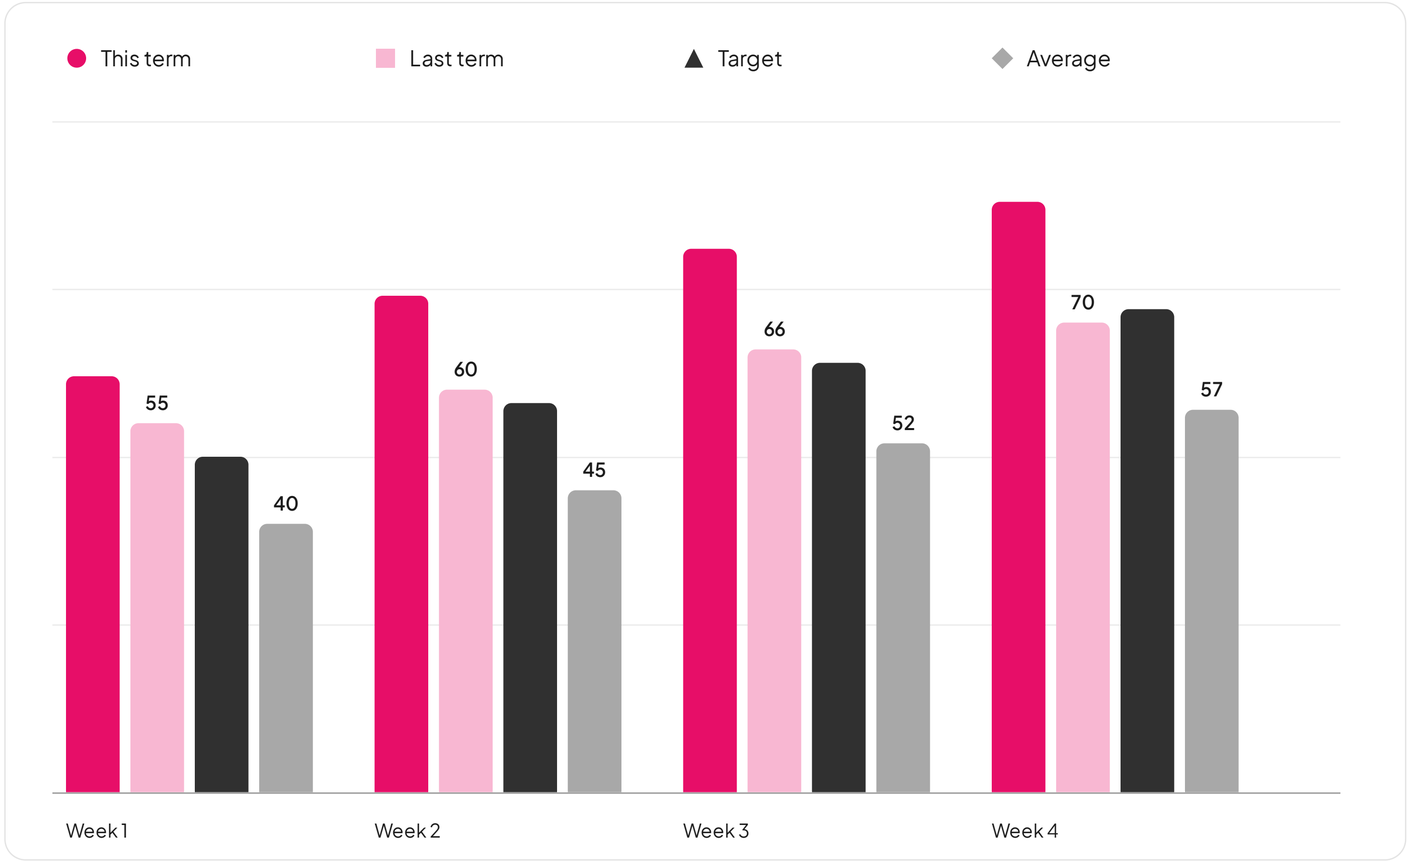

White on Vivid Pink passes at 4.51:1, so the white stays solid.

Sample	Pairing	Ratio	Use
Aa	White on Vivid Pink	4.51:1	Text on pink
Aa	Vivid Pink on white	4.51:1	Headings, links
Aa	Black on white	17.40:1	Body text
Aa	Darker Pink on white	5.04:1	Button hover. Splash backgrounds on Vivid Pink.
Aa	Purple on white	8.35:1	Logo and one accent
Aa	Vivid Pink on 5% pink	4.16:1	Fails: text is black
Aa	Vivid Pink on app grey #F7F7F7	4.21:1	Fails: text is black
Aa	86% white on Vivid Pink	3.58:1	Fails: solid white only
Aa	Purple on Vivid Pink	1.85:1	Never

Charts

Charts use four colours, in this order: Vivid Pink, Vivid Pink 30%, dark grey #303030 and light grey #A8A8A8.

Aim for four series or fewer. The two faint colours always carry written values, and every series has its own marker shape, so a chart never relies on colour alone. When one series is in focus, the other marks fade to 15%.

Retired colours and borders

Status: show status with an icon, clear wording and an outline or a black fill.

Draft ✓ Live

Borders are black at any opacity; the default is #E3E3E3. Use the design system border tokens.

Near matches #7C3AED, #EC4899 and #14B8A6 are never used.

Retired colour	Hex	Use instead
Radical Pink	#FF4081	Vivid Pink #E70E68
Darker Pink (old)	#E6005C	Darker Pink #DB005B
Radical Purple as a background, button or text colour	#6A1EBB	Retired outside the logo. Vivid Pink for buttons, white or Vivid Pink for backgrounds
Lighter Purple	#7831C8	Retired, no replacement
Deep Space Blue as a text or background colour	#1A1A2E	Black for text; no dark backgrounds. The logo wordmark keeps its own colour
Teal	#1BCFA5	Retired, no decorative accent colour
Rose	#FAF0F6	Vivid Pink at 5% #E70E680D

Our typography

At AhaSlides, our typography reflects our brand personality—modern, engaging, and approachable. We've carefully chosen fonts that ensure clarity, accessibility, and a strong visual identity across all platforms.

Plus Jakarta Sans

Our typeface is Plus Jakarta Sans, in two weights only: Regular (400) and SemiBold (600).

The design system is the source of truth for type: design.ahaslides.io.

SemiBold Regular

UPPERCASE	ABCDEFGHIJKLMNOPQRSTUVWXYZ
LOWERCASE	abcdefghijklmnopqrstuvwxyz
NUMERALS	0123456789
PUNCTUATION	. , : ; ? ’ “ ” ( ) / & @ % – #

Paragraph leading

Leading plays a crucial role in paragraph legibility. We use a comfortable and line spacing to allow readers to navigate through the text easily.

We also keep in mind that lengthy paragraphs can be daunting to readers. We break them down into smaller, digestible chunks, typically containing no more than five to seven sentences

150% of type point size

Body text

At AhaSlides, we believe in breaking barriers between ideas and engagement. Our platform transforms static presentations

130% of type point size

Headings

At AhaSlides, we believe in breaking barriers between ideas and engagement. Our platform transforms static presentations

120% of type point size

Display

At AhaSlides, we believe in breaking barriers between ideas and engagement. Our platform transforms static presentations

Pairing rule

Headlines are SemiBold (600). Subheadings and body text are Regular (400), so the line under a headline is always lighter than the headline itself.

Card and row titles: SemiBold (600), 24 or 20px.

Headlines carry no extra letter spacing.

The size for each role is in the table on the next page.

Display, SemiBold · Subheading, Regular

Turn passive listeners into engaged participants

AhaSlides takes the heavy lifting out of engagement, making it easier to get people participating and understand what they really think.

Headline, SemiBold · Body, Regular

Turn passive listeners into engaged participants

AhaSlides takes the work out of engagement.

Typography in use

Headlines and buttons are in sentence case: a capital for the first word and proper nouns only, and no full stop at the end.

Line height: 1.2 for display, 1.3 for headings, 1.5 for body text.

Role	Size (px)	Weight	Letter spacing
Display	64, 56	600	0
Headline	48, 40, 32	600	0
Subheading	24, 20, 18	400	0.2px
Title	24, 20	600	0.2px
Body	16, 14	400	0.2px
Subtext	12	400	0.3px
Button	16, 14	600	0

Sizes and spacing are the design system’s tokens.

Icons

We use the design system's icon set, drawn on a 16px grid with rounded caps and joins.

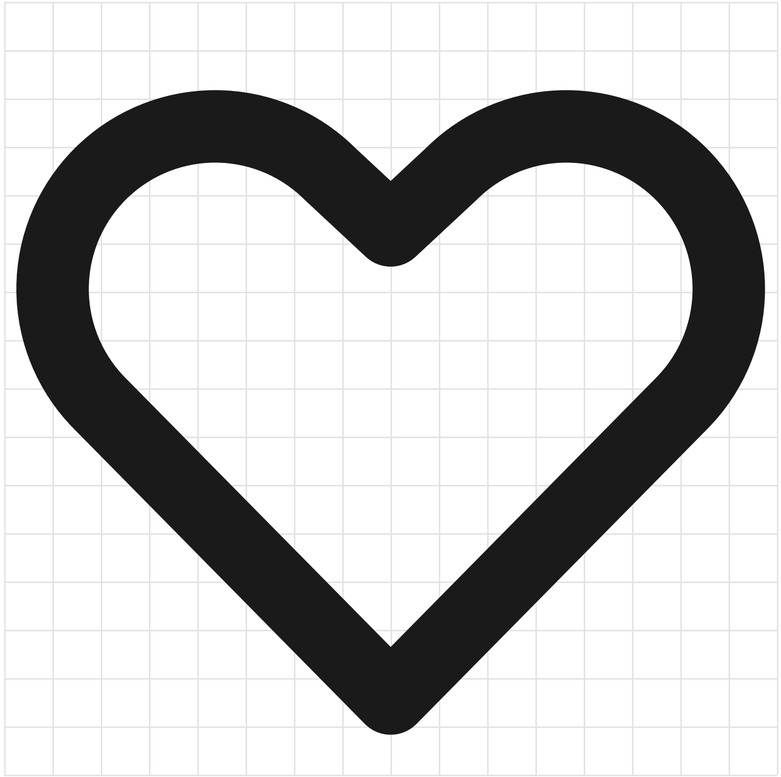

Find every icon at **design.ahaslides.io**. Ask there for a new icon instead of drawing one.

Icon grid

Icons are drawn on a 16 × 16 px grid, with rounded caps and joins.

The stroke is set by the size (see Icon sizes), so the line weight stays balanced. Colour follows the text it sits with.

16 × 16 px grid, 1.5px stroke

Icon sizes

Four sizes only: 12, 16, 24 and 32px. There is no 20px.

Each size has its own stroke, shown under it.

12px
1px stroke

16px
1.5px stroke

24px
2px stroke

32px
2.5px stroke

Imagery

At AhaSlides, our photography reflects our brand personality—authentic, engaging, and modern. The right images help us connect with our users while maintaining a high-quality, professional aesthetic.

Imagery

Use: real moments

Candid, natural shots. No forced smiles or staged poses.

Use: relaxed portraits

Confident and approachable, never stiff.

People with the Splash

Use the ready-made Splash background files, or put the person in a Vivid Pink disc or over the Splash hooks.

In a Vivid Pink disc

On a ready-made Splash file

Imagery

Avoid: staged shots

Polished, exaggerated or generic corporate photos.

Avoid: stiff portraits

Rigid, overly formal head shots.

Never: drawn-on hooks

Never place the hooks freehand, as blobs around a subject, as a repeat pattern or in several colours.

Visualising data

Data tiles and charts use Vivid Pink, Vivid Pink 30%, dark grey and light grey on white.

Rises and falls are told with arrows and words, never with green and red.
